Education Background

City University of Hong Kong, China (QS:63) 09/2026-present

Doctor of Engineering in Data Science

Tianjin University, China (985, Double First Class) 09/2023-07/2026

Master of Engineering in Computer Technology, **GPA: 89.01/100**

Core Modules: Natural Language Processing, Software Architecture, Advanced Computer Vision, Big Data Theory and Algorithms, Data Analysis & Data Mining, Advanced Computer Architecture, Advanced Artificial Intelligence.

Tianjin University, China (985, Double First Class) 09/2019-07/2023

Bachelor of Engineering in Artificial Intelligence, **GPA: 90.26/100**

Core Modules: Machine Learning, Parallel Computing, Knowledge Engineering, Computer Vision & Pattern Recognition.

Thesis: Blockchain Group Federated Learning for Industrial Internet **(Outstanding Undergraduate Graduation Thesis)**

Publications

Research Experiences

Intern, Qfin Holdings, Inc., Beijing, China 09/2025-04/2026

- Topic: LLM-assisted algorithm enhancement for gradient boosting models.
- Tasks: Developed an LLM-driven plug-in algorithm to enhance the classification performance of XGBoost; Leveraged the code generation and data analysis capabilities of LLMs for rapid program development and iteration.
- Output: Part of the work published by IJCAI-ECAI 2026 [3] and SIGKDD 2026 [2].

Intern, Pai Ou Cloud Computing (Shanghai) Co., Ltd., Shanghai, China 12/2024-03/2025

- Topic: Distributed deployment and resource optimization for large language models.
- Tasks: Investigated the impact of edge device resource limitations on LLM deployment; Proposed an end-to-end

distributed framework for cloud environments to optimize LLM resource scheduling and performance.

- Output: Part of the work published by AAAI 2026 [4].

Intern, Beijing Wenge Technology Co., Ltd., Beijing, China 05/2022-07/2022

- Topic: Named entity recognition (NER) in low-resource languages.
- Tasks: Conducted research on and implemented advanced NER techniques; Adapted the models for low-resource languages via transfer learning.
- Output: Successfully developed NER models optimized for deployment in low-resource language environments.

iOS Development Leader, Tianjin University, Tianjin, China 09/2019-07/2022

- Topic: iOS front-end development, UI design, and team leadership for high-usage university services.
- Tasks: Designed and implemented the UI and front-end logic for core functionalities; Developed the iOS client UI for a student BBS platform; Managed and executed regular application maintenance and updates.
- Output: Deployed a comprehensive iOS campus service application used by over 38,000 students.

Honors and Awards

First Prize for Academic Scholarship of Tianjin University	2025
Excellent Student Cadre of Tianjin University	2025
Merit Student of Tianjin University	2024
Second Prize for Academic Scholarship of Tianjin University	2024
Excellent Graduates of Tianjin University	2023
Gold Award of China College Students' "Internet" Innovation and Entrepreneurship Competition - Tianjin	2023
Silver Award of China College Students' "Internet" Innovation and Entrepreneurship Competition - Tianjin	2022
Top Ten of Shenzhen International Science and Technology Finance Competition	2022
Second Prize of "Spark Cup" Blockchain Application Competition - Northern Region	2022
Meritorious Winner of Mathematical Contest In Modeling	2022
Excellence Award of China Blockchain Development Competition - Northern Region	2021
Fourth Place of Shenzhen International Science and Technology Finance Competition	2021
Merit Student of Tianjin University	2021
Excellent Student Cadre of Tianjin University	2020
University-Level Outstanding Practice Team of Tianjin University	2020
Merit Student of Tianjin University	2019

Languages and Skills

Mandarin (native), English (fluent, TOEFL: 103), Python, Swift
